

EXHIBIT 1

(Base label):

Resicore®

HERBICIDE

A herbicide for control of annual grasses and broadleaf weeds in field corn, field seed corn, field silage corn, and yellow popcorn.

Group	15	27	4	HERBICIDES
-------	----	----	---	------------

Active Ingredients:

acetochlor: 2-chloro-N-ethoxymethyl-N-(2-ethyl-6-methylphenyl)acetamide.....	31.0%
mesotrione: 2-[4-(methylsulfonyl)-1,3-cyclohexanedione].....	3.3%
clpyralid MEA salt: 3,6-dichloropyridinecarboxylic acid, monoethanolamine salt.....	2.7%
Other Ingredients:	63.0%
Total	100.0%

Contains 336 grams/liter or 2.8 pounds/gallon acetochlor, 36 grams/liter or 0.30 pounds/gallon mesotrione, and 22.4 grams/liter or 0.19 pounds/gallon clpyralid, acid equivalent (3,6-dichloropyridinecarboxylic acid).

Not for Sale, Sale Into, Distribution and/or Use in Nassau and Suffolk Counties of New York State.

Keep Out of Reach of Children

CAUTION PRECAUCION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Precautionary Statements

Hazards to Humans and Domestic Animals

Harmful If Swallowed or Absorbed Through Skin • Causes Moderate Eye Irritation • Prolonged or Frequently Repeated Skin Contact May Cause Allergic Reactions in Some Individuals

Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment (PPE)

Some of the materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category C on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

RESTRICTED USE PESTICIDE

May injure (phytotoxic) susceptible non-target plants.

For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification. Commercial and certified applicators must ensure that all persons involved in these activities are informed of the precautionary statements.

ISOXAFLUTOLE	GROUP	27	HERBICIDE
THIENCARBAZONE-METHYL	GROUP	2	HERBICIDE

CORVUS® Herbicide

For: weed control in field corn, seed corn and corn grown for silage in the states of: AR, AL, CO, DE, GA, IL, IN, IA, KS, KY, LA, MI, MN, MO, MS, MT, NE, NJ, NM, NC, ND, MD, OH, OK, PA, SC, SD, TN, TX, VA, WI, WV and WY.

In the states of CO, KS, and MO use is only allowed under 24c registrations. A current 24c label must be in the possession of the user at the time of the pesticide application.

In the state of MN use is only allowed in accordance with the Minnesota Product Bulletin.

In the state of WI use is only allowed in accordance with the Wisconsin Product Bulletin.

ACTIVE INGREDIENTS:

Thiencarbazone-methyl: (Methyl 4-[[[(4,5-dihydro-3-methoxy-4-methyl-5-oxo-1H-1,2,4-triazol-1-yl)carbonyl]amino]sulfonyl]-5-methyl-3-thiophenecarboxylate) 7.60%

Isoxaflutole [5-cyclopropyl-4-(2-methylsulfonyl-4-trifluoromethylbenzoyl) isoxazole] 19.00%

OTHER INGREDIENTS: 73.40%

TOTAL: 100.00%

Contains 0.75 pounds Thiencarbazone-methyl per U.S. gallon

Contains 1.88 pounds Isoxaflutole per U.S. gallon

EPA Reg. No. 264-1066

Trust[®] Herbicide

A selective herbicide for the preemergence control of annual grasses and broadleaf weeds

Active Ingredient:

trifluralin: α , α , α -trifluoro-2,6-dinitro-N, N-dipropyl-p-toluidine 43%

Other Ingredients: 57%

Total 100%

Contains petroleum distillates. Contains 4 pounds active ingredient per gallon.

Manufactured using the processes of U.S. Patents 4,120,905 and 4,226,789.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Avoid alcohol.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably mouth-to-mouth if possible. Get medical attention immediately. May pose an aspiration pneumonia hazard.

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Get medical attention if irritation persists.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information in case of medical emergency call toll free 1-877-424-7452.

NOTE TO PHYSICIAN: This product contains an aromatic hydrocarbon and can be extremely harmful if swallowed. Aspiration of this product may produce a severe pneumonitis. Stomach lavage with a cuffed endotracheal tube in place and immediate administration of activated charcoal, 6 to 8 heaping teaspoonfuls with water, should be considered. Treatment is otherwise symptomatic and supportive.

SEE BOOKLET FOR ADDITIONAL PRECAUTIONARY STATEMENTS, COMPLETE DIRECTIONS FOR USE, WARRANTY DISCLAIMER AND LIMITATION OF LIABILITY.

(Base label):

GoalTender® HERBICIDE

Use Directions For: artichokes (globe), broccoli/cabbage/cauliflower, cacao, citrus (nonbearing), coffee, conifer (seedbeds, transplants, container stock) and selected deciduous trees, corn, cotton, cottonwood, eucalyptus, fallow bed, (cotton/soybeans) fallow land, garbanzo beans, garlic, guava (Hawaii only), horseradish, jojoba, mint, onions, onions grown for seed, papaya (Hawaii only), soybeans, taro, treefruit/nut/vine

Active Ingredient

oxyfluorfen: 2-chloro-1-(3-ethoxy-4-nitrophenoxy)4-(trifluoromethyl)benzene	41%
Other Ingredients	59%
Total	100%

Contains 4 pounds active ingredient per gallon

Shake Well Before Using

Keep Out of Reach of Children

CAUTION

Precautionary Statements

Hazards to Humans and Domestic Animals

Avoid contact with skin or clothing.

Personal Protective Equipment (PPE):

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection chart.

Mixers, loaders and applicators using engineering controls (see Engineering Controls requirements below) must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks
- Chemical-resistant gloves such as Nitrile, Butyl, Neoprene, and/or Barrier Laminate) when mixing and loading
- Chemical-resistant apron when mixing and loading

All other mixers, loaders, applicators and other handlers must wear:

- Coveralls over long-sleeved shirt and long pants
- Chemical-resistant footwear plus socks
- Chemical-resistant gloves (such as Nitrile, Butyl, Neoprene, and/or Barrier Laminate)
- Protective eyewear (goggles or face shield)
- Chemical-resistant headgear for overhead exposure
- Chemical-resistant apron when exposed to the product concentrate

EMERGENCY INFORMATION

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

FOR THE FOLLOWING EMERGENCIES, PHONE 24 HOURS A DAY:

For Medical Emergencies phone:.....1-888-681-4261

For Transportation Emergencies, including spill, leak or fire, phone: CHEMTREC®.....1-800-424-9300

For Product Use Information phone: AMVAC®.....1-888-462-6822

NOTE TO PHYSICIAN: This product is a cholinesterase inhibitor. Severe symptoms and signs include diarrhea, pinpoint and non-reactive pupils, respiratory difficulty, pulmonary edema, cyanosis, loss of sphincter control, convulsions, and coma. Support respiration as needed. Measures should include removal of secretions, maintenance of a patient airway, and if necessary, artificial ventilation.

If cyanosis is absent, give ATROPINE 2-4 mg intravenously (0.05 mg/kg for children). Repeat atropine at 5-10 minute intervals until atropinization occurs (dry, flushed skin, tachycardia, pupillary dilatation), and maintain for 48 hours. If cyanotic, give initial atropine intramuscularly and start measures to improve ventilation.

Start 2-PAM (PROTOPAM, Ayerst) at the same time. Give 1-2 grams PROTOPAM (20-40 mg/kg for children) in 100cc saline over 15-30 minutes. If pulmonary edema is present, give intravenously slowly as a 5% solution in water over a period of at least 5 minutes. A second dose may be given after one hour if muscle weakness persists.

Additional doses may be given cautiously for persistent muscle weakness. May be given by intramuscular or subcutaneous routes if intravenous administration is not feasible.

In case of skin contact, wash patient with soap and water followed by wash with 95% ethyl alcohol. Keep patient under constant observation for 24-36 hours. Symptoms may persist for one month.

The use of theophylline, morphine, barbiturates, phenothiazines, reserpine, and succinyl choline is contraindicated.

EXHIBIT 4

ACETOCHLOR - GENERAL INFORMATION

Acetochlor is a herbicide widely used on corn in Minnesota, and its use has expanded to soybeans and sugar beets. Common trade names for acetochlor products include Harness, Keystone, SureStart, Surpass, Volley and Warrant*. In 2016, it was applied to 56% of Minnesota corn acres, making it the second-most-used corn herbicide in the state in terms of acres covered (see [Pesticide Use in Minnesota \(/pesticide-fertilizer/pesticide-use-sales-data\)](#)). Depending on the specific acetochlor product label, it is registered in Minnesota for use on field corn, popcorn, production seed corn, silage corn, sweet corn, soybeans, and sugar beets.

Controlling annual grasses, such as Giant Foxtail pictured above, is a strength of acetochlor. (Photo: Photobucket.com)

Acetochlor controls weeds by inhibiting growth of seedling shoots. It needs to be applied before weeds germinate to be effective; therefore, it is typically applied just before or after planting. Acetochlor provides good control of most annual grassy weeds and a number of annual broadleaf weeds. Its control of perennial weeds is limited to yellow nutsedge ([2023 Weed Control Guide for Field Crops, Michigan State University](#) (https://www.canr.msu.edu/resources/Weed_control_guide_for_field_crops_e0434)). It is often used in combination with other herbicides to obtain "broad-spectrum" weed control. Atrazine is the most common premix partner with acetochlor ([Table 3 \(/acetochlor-and-minnesotas-environment#Table%203\)](#)).

Other preemergence corn herbicides which provide weed control similar to acetochlor include dimethenamid-*P* (Outlook, Slider), S-metolachlor (Charger, Dual II Magnum, Cinch), and pendimethalin (Prowl)* and many others. ([Trials comparing herbicide systems for weed control in field corn, University of Minnesota](#) (<https://appliedweeds.cfans.umn.edu/research-reports>)).

Acetochlor is in the chloroacetanilide herbicide family which also includes the herbicides alachlor, dimethenamid, and metolachlor. It is in herbicide Site of Action Group 15, known as long-chain fatty acid inhibitors ([Herbicide Classification Poster, Mode of Action, January 2017 - PDF](#)) (https://iwilltakeaction.com/uploads/55620-1_TA_HRM_2017Poster.pdf), acetochlor had been found at concentrations of concern in south-central Minnesota streams. One water body, the Silver Creek located in central Minnesota, is on the state's impaired water list due to elevated concentrations of acetochlor.

Acetochlor is currently not a Restricted Use Pesticide (RUP); therefore, no special certification is needed for its use unless it is being applied for hire or if it is being used in combination with a Restricted Use Pesticide such as atrazine. If acetochlor is being applied for hire or used in combination with a Restricted Use Pesticide, pesticide applicators need to be licensed or certified by the MDA, a process which includes passing an exam on proper pesticide use. Please view [Minnesota's pesticide applicator certification and licensing programs \(/licensing/licensetypes/pesticidedealer/dlrbulkrupeq\)](#) for more information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

Mention of companies or commercial products in this report does not imply recommendation or endorsement by the U.S. Department of Agriculture over others not mentioned. USDA neither guarantees nor warrants the standard of any product mentioned. Product names are mentioned solely to report factually on available data and to provide specific information.

This publication reports research involving pesticides. All uses of pesticides must be registered by appropriate State and/or Federal agencies before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, and fish or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

II. Need for the Proposed Action

APHIS is proposing to cooperate with other Federal and State agencies, grower groups, and growers in a program to eradicate the boll weevil from cotton fields in the Southern Rolling Plains of Texas. The proposed action is needed to (1) reduce agricultural losses suffered by growers as a result of continuous boll weevil infestation, (2) substantially reduce the amount of pesticides used by growers and the cost of applying those pesticides to control boll weevil and other cotton pests, (3) maintain the biological integrity and efficacy of the national program to eradicate the boll weevil, and (4) comply with relevant pest control statutes and regulations.

APHIS' authority for cooperation in this proposed program is based upon and complies with the Incipient and Emergency Control of Pests [Act] (1937), the Organic Act of the Department of Agriculture (1944), the Cooperation with State agencies in the Administration and Enforcement of Certain Federal Laws Act (1962), and the Food Security Act of 1985.

III. Alternatives

The national program to eradicate the boll weevil employs a beltwide integrated control strategy. Integrated control, in this case, involves the selection of a particular control method or combination of methods for an individual site, based on factors including variations in boll weevil biology, availability of overwintering sites, environmental concerns, weather patterns, and crop production requirements. Consistent with the strategy used in the national program, integrated control considered as alternatives within this EA include (1) limited no action, (2) biological control, (3) chemical control (azinphos-methyl, diflubenzuron, endosulfan, malathion, methyl parathion, or oxamyl), (4) cultural control (use of short-season cotton varieties and/or mandatory stalk destruction), (5) mechanical control (mass trapping and bait tubes), and (6) sterile insect technique.

A. Limited No Action

For the purposes of this proposed program, the limited no action alternative is defined as no cooperative control action in an individual site within the program's area of operation.¹ It is conceivable that, because of a site's special characteristics, no

¹ A variety of interpretations may exist for the no action alternative, including entirely (no program) or possibly no Federal involvement. However, the most probable result of implementing either of these other interpretations would be that the existing high pesticide use patterns would continue. Under those circumstances, the environmental effects of no action would be more severe than those that might be incurred in the implementation of the proposed action. In APHIS' judgment therefore, the public's interest is better served through analysis of a limited no action alternative.

North Dakota Herbicide Chart

Repeated use of herbicides with the same site of action alone can result in the development of herbicide-resistant weed populations.

By Mode of Action (effect on plant growth)

This chart groups herbicides by their modes of action to assist you in selecting 1) to maintain greater diversity in herbicide use and 2) to rotate among herbicides with different sites of action to delay the development of herbicide resistance.

The Site of Action Group is a classification system developed by the Weed Science Society of America and Herbicide

Site of Action Group	Chemical Family	Active Ingredient	Product Examples
1 ACCase Inhibitors (acetate CoA carboxylase)	Any oxyphenoxypyrone "Top"	clodinafop-propargyl fenoxaprop-P ethyl fluazifop-P butyl quizalofop-P ethyl	Discover NG Parity, Tacoma, others Assure II, Targa
	Cyclohexanedione "Dion"	cloransulfuron sethoxydim	Select Max, Arrow, others
	Phenylpyrazolin "Dion"	pinoxaden	Axial XL
2 ALS Inhibitors (acetolactate synthase)	Imidazolinone "Im"	imazamox imazapic imazethapyr	Beyond, Raptor Platou Pursuit
	Sulfonurea "SU"	halosulfuron mesosulfuron mesosulfuron-methyl rimisulfuron sulfosulfuron tribenuron trifluralin	Permit, others Osprey Aly, Cimarron, Escort, others Accent Q Matrix, Resolve, others Outsider Harmony, others Express, others UpBeet
	Triazopyrimidine "TPS"	clorasulfuron forasulfuron flumetsulam pyrosulfuron	FirstRate component of several Pythos PowerFlex, Teammate
	Triazinones "SACT"	flucarbazone propoxycarbazone thiencarbazone	Everest 3.0, Prepara, others Olympus Varrow
9 EPSP Synthase Inhibitor (5-enolpyruvylshikimate -3-phosphate)	Glycine	glyphosate	Roundup, Durango, others
4 Synthetic Auxins (TRR, AFS, and Specific Site Unknown)	Benzoic acid Phenoxy Pyridine Pyridoxyl Quinoline	dicamba 2,4-D MCPA clopyralid haloxifen-methyl quinclorac	Banvel, Clarity, Engenia, Diflexx, Xtendimax, others MCPA, others Stinger, others Elevere Starane, others Facet
19 Auxin Transport Inhibitor	Aryl carboxylate	diflufenopyr	component of Status
5 Photosystem II Inhibitors (Setine 264 binders)	Phenyl-carbamate Triazine Triazinone Ureas	desmedipham phenmedipham atrazine metribuzin linuron	component of Betamix component of Betamix Atrax, others Metribuzin, others Lorex, others
6 Photosystem II Inhibitors (Setine 215 binders)	Benzothiadiazole Nitile Phenyl pyridazine	benazox bromoxynil pyridate	Basagran 3L, others Buctril, others Tough
10 Glutamine Synthetase Inhibitor	Phosphinic acid	glufosinate	Liberty 200, others
27 HPD Inhibitors	Isoxazole Pyrazole Triketone Benzoylpyrazole	isoxaflutole pyrasulfotole topramezone mesotrione tembotrione bicyclopyrone tolpyralate	Balance Flexx component of Huskie Armenon, Impact Callisto Laudis component of Acuron Shieldex
14 PPO Inhibitors	Diphenylether N-phenylimide Phenylpyrazole Triazinone	acifluorfen fomesafen lactofen flumiclorac flumioxazin sulfentrazone lactofen pyraflufen carfentrazone sulfentrazone	Ultra Blazer Flexstar, Reflex, others Cobra, Phoenix Resource Valor EZ Cadet Sharpen Reviton ET, Vida
22 Photosystem I Electron Diverter	Bipyridium	diquat paraquat	Reglone, others Gramoxone, others
3 Microtubule Assembly Inhibitors	Dinitroaniline	ethalfluralin pendimethalin trifluralin	Sonalan Prowl H ₂ O, others Treflan, others
15 Very Long-Chain Fatty Acid Synthesis Inhibitor	Acetamide Benzofuran Benzoxazole Thiocarbamate	acetochlor metolachlor dimethenamid-P ethofumesate isoxazoline cycloate EPIC trialate	Harness, Surpass, Warrant Dual, others Outlook Norton, others Zidua SC Ro-Neet SB Egane, others Far-Go, Avadex MA
31			Cultivate, Plow, others

This chart lists premix herbicides alphabetically by their trade names so you can identify the premix's component herbicides and their respective site of action groups. Refer to the Mode of Action chart on the left for more information.

Premix Trade Name	Trade Name	Active Ingredient	Site of Action Group
Acuron	Alexx	atrazine	4
	Dual II Magnum	s-metolachlor	15
	Callisto	mesotrione	27
		bicyclopyrone	27
Acuron Flexi	Dual II Magnum	s-metolachlor	15
	Callisto	mesotrione	27
		bicyclopyrone	27
Acuron GT	Roundup	glyphosate	9
	Dual II Magnum	s-metolachlor	15
	Callisto	mesotrione	27
		bicyclopyrone	27
		resulfuron	2
Alforia	Resolve	trifluralin	2
	Harmony	trifluralin	2
	Valor	flumetsulam	14
	Aim	carfentrazone-ethyl	14
Anthem Flex	Zidua	pyrasulfotole	19
Armenon Pro	Outlook	dimethenamid-P	15
Armenon	Armenon	topramezone	27
Authority Assist	Pursuit	imazethapyr	2
	Spartan	sulfentrazone	14
Authority First or Sonic	FirstRate	sulfentrazone	14
	Spartan	sulfentrazone	14
Authority MTZ	Metribuzin	metribuzin	5
	Spartan	sulfentrazone	14
Authority Supreme or Authority Edge	Spartan	sulfentrazone	14
	Zidua	pyrasulfotole	19
Axial Bold	Tacoma	fenoxaprop-P ethyl	1
	Axial XL	propanil	1
	Tacoma	fenoxaprop-P ethyl	1
